Contents of Volume 14

PERCEPTION AND PERFORMANCE

Visual and tactual interaction in judgments of the vertical by G. Kress and J. Cross, 165

A simplified table for the estimation of magnitude of experimental effect by H. Friedman, 193

VISION

Visual search and memory under degraded and masked presentation by L. G. Standing and R. N. Haber (Vol. 13, pp. 81-82)
Erratum, 50

Degree of stimulus complexity and habituation of visual fixation in infants by R. F. Caron and A. J. Caron, 78

The effect of head position on size discrimination by P. W. Zinkus and P. T. Mountjoy, 80

Figural after-effects and field dependence: Another ground for scepticism by P. C. Dodwell, 84

Effects of an artificial pupil in visual perception by D. L. Schurman (Vol. 11, p. 57)
Comment on Schurman: Effects of an artificial pupil in visual perception by R. Hilz and C. R. Cavonius, 200

Two types of depth discrimination by the human infant with five inches of visual depth by R. D. Walk, 253

Variation in visual input and the occipital EEG by A. Gale, N. Dunkin, and M. Coles, 262

Brightness discrimination in reflected laser light by L. E. Hogan, C. L. Rudder, S. H. Levine, and C. L. Askland, Jr., 265

Identification and localization with digit and letter spans by M. J. White, 279

LOWER SENSES

Simultaneous and successive cutaneous two-point thresholds for vibration by P. Eskildsen, A. Morris, C. C. Collins, and P. Bach-y-Rita, 146

Simplicity as a principle in tactual form perception by J. E. Roeckelein (Vol. 13, pp. 195-196)
Erratum, 166

The effect of prolonged visual deprivation on various cutaneous and auditory measures by J. Phelps and J. P. Zubek, 194

PERFORMANCE

GSR and breathing amplitude related to emotional reactions to music by H. A. Ries, 62

Arithmetical estimation under conditions of different payoff matrices by A. Lieblich and I. Lieblich, 87

The effects of variations in confirmation training on discrimination performance by S. Seitz, 145

Decision speed for the choosing of the larger or the smaller of two digits by B. A. Fairbank, Jr., and J. Capehart, 148

Activation by IMT: An alternative to within-subjects designs by E. Neva, R. A. Hicks, and W. W. Hahn, 149

Rotary pursuit performance as a function of watching demonstrations at slower speeds by H. S. Rosenquist, 157

Generalization of habituation of the GSR to white noise of varying intensities by J. P. James and G. R. Hughes, 163

Heart rate and skin resistance during sleep before and after 60 hours of sleep deprivation by J. G. Craig, M. W. McCabe, and W. D. Fenz, 169

Choice reaction time and the nature of the choice response by R. Gottsdanker, 257

Background light intensity and the pupillary response in a reaction time task by J. L. Bradshaw, 271

PSYCHOPHYSICS

Response modification by "irrelevant" stimulus attributes by R. Adamson and K. Everett, 81

Signal-detection experiments as tests for risk-taking: A pilot study by Y. H. Poortinga, 185

HUMAN LEARNING AND THINKING

A sequential test of performance (STOP) for all-or-none learning data by A. J. Nash, 77

CONDITIONING

Conditional probability of reinforcement and sequential behavior in human conditioning with intermittent reinforcement schedules by W. F. Prokasy and K. L. Kumpfer, 49

Resistance to extinction in classical GSR conditioning as a function of acquisition trials beyond peak CR size by A. I. Silver and H. D. Kimmel, 53

Discrimination gradients in human eyelid conditioning by W. F. Prokasy, C. K. Allen, and M. K. Dey, 191

Human eyelid conditioning: The interaction of reinforcement schedule and CS-US interval length by J. W. P. Ost, R. E. Hill, and J. Nakelski, 259

REINFORCEMENT

Extinction of an instrumental response by simulation of response-produced feedback: A case of no-trial extinction with reinforcement by V. B. Cervin, T. Horvath, and R. Konopasky, 51

The effect of social reinforcement on children's story themes by V. Hays and E. Willemsen, 63

Some observations of reinforcer preference in children by T. J. Tighe and L. S. Tighe, 171

Decreased sensitivity to punishment by L. Weinstein, 264

Resistance to extinction in children as a function of N-length and number of different N-lengths by P. M. Litchfield and P. H. Duerfeldt, 299

DISCRIMINATION LEARNING

The effect of dimensional preference on reversal shift behavior of young children by L. M. James, T. G. O'Brien, and J. F. Brinley, 56

The effects of avoidability and unavoidability of punishment on stimulus selection by R. E. Sanders, 150

The overtraining reversal effect in a probability learning situation by D. R. Yelen and D. Yelen, 152

Extinction as a function of run structure in two choice human learning by J. E. Hunter, 275

VERBAL LEARNING

Response and associative learning as a function of warmup by J. C. Koeppel and A. M. Raffetto, 59

Conditioned word meaning and the interstimulus interval by G. J. Coles and T. B. Leonard, III, 60

The effect of repetition upon the serial learning of familiar items by J. F. Catalano, 65

Narrative stories as mediators for serial learning by G. H. Bower and M. C. Clark, 181

Instructions, ordering, and previous practice in free-recall learning by G. Wood and D. Clark, 187

A test of the cluster hypothesis of serial learning by J. R. Heslip, 273

Information, similarity and vocalization in free learning of numbers by S. Slak, 283

MEMORY

Acoustic versus associative models of short-term memory coding by J. F. Marshall, R. O. Rouse, Jr., and R. M. Tarpy, 54

Repetition effects and the ordered recall of categorized serial lists by J. R. Craig and W. H. Bartz, 67

STM in retardates as a function of direction and delay of recall by W. R. Blount, 69

The disturbance effect of white noise on human short-term memory during learning by W. Sloboda, 82

The effect of the length of list on characteristics of the serial position curve by D. R. Yelen, 156

Rate of presentation and partial reinforcement effects in transfer of training by W. R. Frohring and L. R. Goulet, 158

Retroactive inhibition of preexperimentally established associations by E. P. Russell and A. E. Goss, 173

Free recall of trigrams in the presence of distractors: A replication by C. N. Cofer and P. W. Dorfman, 197

On free recall and free-recall scoring in immediate memory by R. G. Crowder, 255

Locus of the effect of distinctiveness on response recall by S. D. Leonard and K. A. Jacobus, 284

Retention as a function of natural language mediation and of time by W. R. Smith, 288

Clustering in free recall based upon input contiguity by W. P. Wallace, 290

Effect of stimulus presentation modes on children's recall and clustering by A. B. Horowitz, 297

VERBAL PROCESSES

Sex and level of mediator abstractness as variables in mediate association by T. Christiansen, 160

Response probabilities in a verbal discrimination task with probabilistic reinforcement by I. P. Levin and J. F. Dooley, 167

Acoustic confusability values for 1172 CCC trigrams by D. Scott and A. D. Baddeley, 189

Familiarity of configuration vs discriminability of features in the visual identification of words by F. Smith, 261

Encoding homophones and synonyms for verbal discrimination and recognition by H. Buschke and R. Lenon, 269

Symmetry and configuration in words and patterns of similar structure by P. N. Hamid, 281

Transitional errors and deep structure differences by R. E. Davidson, 293

PROBLEM SOLVING AND CONCEPT FORMATION

Concept formation as a function of perceptual pretraining and knowledge of results by B. R. Brown, D. W. Walker, and S. H. Evans, 71

Effect of number of irrelevant dimensions with ten concept types on the attribute identification task in the selection mode with exemplar and non-exemplar start cards by L. M. Giambra, 75

Discriminability and preference in concept identification by B. D. Downing, 85

A comparison of tactile and visual concept learning by A. Wolfgang, 175

Hierarchies in concept attainment in the selection mode with exemplar and non-exemplar start cards by L. M. Giambra, 177

Shifting from a simple to a conjunctive concept by R. D. Sutherland and W. P. Brown, 179

Concept identification with reinforcement of hypotheses and misinformative stimulus labeling by J. R. Erickson and K. K. Block, 183

Schema mediation in categorization learning by E. M. Edmonds and S. C. Edmonds, 196

Concept acquisition as a function of frequency of occurrence in verbal context by S. J. Woolum and D. M. Johnson, 199

Concept identification strategies used for positive and negative instances by J. P. Denny and J. G. Benjafield, 277

Logical and empirical thinking in a problem solving task by J. Benjafield, 285

Individual differences in information processing during concept learning by L. I. Jacobson, J. Millham, and S. E. Berger, 287

A three-mode factor analysis of the concept of novelty by A. L. Bernstein and F. W. Wicker, 291

SOCIAL PROCESSES

Efficiency of communicating personality impressions as a function of coding context by J. E. Boyd, 57

The effects of conflict intensity and promisor credibility on a target's behavior by J. Horai, S. Lindskold, J. Gahagan, and J. Tedeschi, 73

Attitude evoked anticipatory responses and attraction by W. Griffitt, 153

Conflict of interest and attraction in the development of cooperation by R. Fisher and W. P. Smith, 154

Feedback effects and social facilitation of vigilance performance: Mere coaction versus potential evaluation by E. Klinger, 161

Effects of consistent or deviant modeling cues on the adoption of a self-imposed standard by J. H. Hill and R. M. Liebert (Vol. 13, pp. 243-244)
Erratum, 166

Effects of a model's experience on children's imitation by R. M. Liebert and M. K. Allen, 198

Effects of factual information on creating resistance to emotional appeals by S. Himmelfarb and J. Youngblood, 267

Reducing inequity by reallocating rewards by G. S. Leventhal, J. Allen, and B. Kemelgor, 295

PHYSIOLOGICAL PSYCHOLOGY

Sex differences in the activity wheel as a function of fetal age at irradiation by J. C. Martin (Vol. 13, pp. 249-250)
Erratum, 252

BRAIN FUNCTIONS

Probability learning in rats reinforced with brain stimulation by R. N. Johnson and R. S. Levy, 27

Effects of nucleus posterior thalami lesions on the performance of visual discriminations by M. Peters and R. M. Cooper, 97

Avoidance behavior in rats as a function of the size and location of anterior cingulate cortex lesions by C. L. Trafton, R. A. Filbey, and R. W. Johnson, 100

Escape and avoidance learning for discontinuous ICS as a function of intertrial interval by R. N. Johnson and R. S. Levy, 106

Escape latencies at three levels of electric shock in rats with amygdaloid lesions by E. D. Kemble and G. J. Beckman, 205

The interactive effect of amphetamine on the activity level of rats with lesions in the septum by R. O. Pihl and I. Greenberg, 216

The effects of bilateral hippocampal lesions on two-way active avoidance in the guinea pig by L. C. Ireland, W. N. Hayes, and R. E. Schaub, 249

DRUG EFFECTS

The effects of shock intensity and d-amphetamine on avoidance learning by G. A. Cicala and E. Kremer, 41

Scopolamine and reinforcement omission on fixed-interval schedules by N. K. Innis and J. E. R. Staddon, 43

Indirect effect of puromycin on memory by S. Reinis, 44

The effects of magnesium pemoline upon repeated acquisition and extinction of a bar press response by P. M. Adams, F. T. Crawford, and W. G. Lee, 101
Effects of magnesium pemoline on avoidance behavior in rats by R. F. Ritzmann, L. Miller, and R. W. Bell, 103
Diphenylhydantoin effects on avoidance conditioning as a function of age and problem difficulty by B. Doty and R. Dalman, 109
The effects of a cholinesterase inhibitor on place learning in mice by H. K. Merrill, 110
Differential effects of d-amphetamine in classical discrimination conditioning of rabbits by W. Peel and A. Yehle, 210
The effects of magnesium pemoline, caffeine and picrotoxin on a food reinforced discrimination task by B. R. Cooper, W. J. Potts, D. L. Morse, and W. C. Black, 225
Quantitative indices of alcohol effects on the rat by G. M. Cartwright and L. W. Buckalew, 240

BIOCHEMICAL CORRELATES
Effects of social stimuli on the adrenal cortex in male mice by J. Archer, 17
Chemical variation in brain loci during water maze performance by J. Gaito, J. H. Davison, and J. Mottin, 46
"Transfer of learning" by injection of brain RNA as a function of time by L. J. Schad, J. E. Rollins, and C. W. Snyder, 112
Light deprivation from birth and acetylcholinesterase activity in cortex of mature rats by A. Corvin and S. Axelrod, 251

ANIMAL BEHAVIOR

EMOTIONAL BEHAVIOR
Emotionality ratings and open-field behavior by C. D. Corman and J. Biondo, 122
Changes in the open field behavior of female golden hamsters by D. Jowaisas, 126
The relationship between fear and exploration in rats by D. Lester, 128
Contrasting effects of group housing and isolation on subsequent open field exploration in laboratory rats by J. Archer, 234
The effect of FR response requirement on aggressive behavior in rats by W. D. Gentry and R. W. Schaeffer, 236

MOTIVATION
The Coolidge Effect in male rat copulatory behavior: Failure to replicate Fisher's results by S. Hsiao, 1
Effects of early experience on food preference in chicks by G. M. Burghardt, 7
Effects of raising rats on a liquid or solid diet on response choice made with hunger and thirst simultaneously operative by R. J. Thompson, Jr., and T. B. Leonard, 9
Contrast effects with a shift in work load by R. Adamson and D. Gunn, 11
The bathing behavior of the chinchilla: Effects of deprivation by J. J. Stern and A. Merari, 115
Food and novel objects as incentives by W. Wilson and G. Taylor, 120
The effects of deprivation and post-deprivation on the heart rate of rats by S. Ashida, 123
Orderliness and activity in the exploratory behavior of rats by D. Lester, 125
The interaction of psychogenic polydipsia with wheel running in rats by E. F. Segal, 141
Social facilitation of eating in the rat by K. T. Hoyenga and S. Aeschleman, 239

VISION
Differential visual depth discrimination of hooded as compared to albino rats by P. H. Davidson and R. D. Walk, 207
Maintained generalization gradients in the monkey by R. H. Schuster and C. G. Gross, 215

CONDITIONING
Conditioning in the Horseshoe Crab by W. L. Makous, 4
Instrumental conditioning of the running-wheel response of food-deprived rats by R. E. Connally, 131
Shock-induced facilitation of a partially extinguished CER by V. L. Quinsey and J. J. B. Ayres, 213
Priming the pecking response in pigeons by R. L. Reid, A. French, and J. S. Pollard, 227
Preconditioning exposures to the CS: Variation in place of testing by D. C. Anderson, D. Wolf, and P. Sullivan, 233
The effect of CS-induced fear on a partially extinguished CER by V. L. Quinsey and J. J. B. Ayres, 242

DISCRIMINATION LEARNING
Intradimensional and extradimensional shift learning by pigeons by N. J. Mackintosh and L. Little, 5
Discrimination learning and extinction in toads by P. K. Chu and G. McCain, 14
Intra- and extra-dimensional shifts with constant- and variable-irrelevant dimensions in the rat by F. D. Turrisi, B. E. Shepp, and P. D. Eimas, 19
Learning-set formation in the bottlenose dolphin by L. M. Herman, F. A. Beach, III, R. L. Pepper, and R. B. Stalling, 98
Learning with one and two cues by N. S. Sutherland and L. Andelman (Vol. 7, pp. 107-108)
Reply to Sutherland and Andelman by H. Babb (Vol. 13, p. 283)
Reply to Babb by N. S. Sutherland, 116
Form discrimination and reversal learning in kittens by J. M. Warren, 117
Innate factors in imprinting by E. H. Hess and D. B. Hess, 129
Reversal learning improvement in the fish *Astronotus ocellatus* (Oscar) by L. H. Squier, 143
Second-eye reversal acquisition as a function of overlearning and level of illumination by F. J. Temple and C. L. Sheridan, 201
Effects of time out and S+ postponement training procedures on free operant discrimination acquisition by M. E. Snow and C. N. Uhl, 218
Discrimination-reversal skills in squirrel monkeys: The reversal index and the reversal-acquisition ratio compared by M. A. Jeeves and A. H. Winefield, 221
Spatial SDR performances across three species of new world monkeys by R. L. Gossette and P. Slonim, 222
Effects of stimulus comparison during discrimination training on subsequent transposition and generalization gradients by L. B. Sachs, 247

AVOIDANCE AND PUNISHMENT
Effects of drinkometer current and of foot shock on psychogenic polydipsia by E. F. Segal and D. L. Oden, 13
Licking suppression and recovery as functions of contingency, locus, and frequency of punishment by W. G. Braud and R. E. Prytula, 16
Facilitative effects of shock on bar-pressing by A. R. Miller, R. A. Stewart, R. A. R. Watson, and V. L. Kiker, 21
Response suppression after transfer from shock-escape to thirst-motivated training by H. Babb and J. K. Leask, 23
Self-punitive behavior: One way to stop it by R. C. Martin, 25
Facilitative effects of punishment on aggressive behavior in the Siamese fighting fish by K. B. Melvin and J. E. Anson, 89
The reduction of avoidance behavior as a function of gentling by H. B. Altman and L. S. Hommel, 91
Avoidance conditioning following preadaptation to weak shock by R. Adamson, P. Henke, and D. O'Donovan, 119

The effects of punishment on food pellet discrimination by W. F. Vitulli, 132
Age differences in one-trial passive avoidance learning by R. L. Brunner, 134
Deprivation and escape conditioning with various intensities of shock by M. E. Meyer, W. A. Adams, and V. K. Worthen, 212
Spontaneous recovery of an escape response by F. C. Leeming, J. L. Lightman, and T. J. Newsom, 219
Discrimination avoidance learning with alternate discontinuous and continuous US escape trials by J. N. Shafer and J. H. Hess, 237

REINFORCEMENT AND EXTINCTION

Different levels of performance with equivalent weights of reward by J. McCain, 2
Extinction of differential reward magnitude discrimination in a discrete bar-pressing situation by J. W. Davenport and C. F. Flaherty, 29
A vigilance-like decrement without vigilance by P. J. Riddick, 31
Incentive reduction: Increases in postreinforcement detention and subsequent responding by J. H. McHose and L. L. Jacoby, 32
The effect of unreinforced-reinforced sequences on resistance to extinction following partial reinforcement by R. L. Koteskey, 34
Discrimination contrast: Speeds to small reward as a function of locus and amount of interpolated reinforcement by F. R. Maxwell, Jr., P. A. Meyer, R. S. Calef, and E. R. McHewitt, 35
Extinction under nine food deprivation levels by J. W. Cotton, W. F. Hill, and M. E. Shanab, 37
The "depression effect" and the problem of odor control by S. F. Davis and H. W. Ludvigson, 93
Effects of food reward and frustrative nonreward during escape training by J. J. Franchina, 95
Differential running in rats under an alternating (FR 2) schedule in an automated runway by P. V. Hanford and J. Zimmerman, 107
Frustrative nonreward effects in acquisition under zero hours deprivation by L. Dachowski and W. P. Dunlap, 113
Choice between magnitudes of reward as a function of free vs forced trial procedures by M. F. Burrill and N. E. Spear, 135
Frustration effect as a function of training magnitude in a within-S design by J. H. McHose, P. A. Meyer, and F. R. Maxwell, Jr., 137
Some effects of fixed-ratio size and reinforcement frequency on the accuracy of a conditional discrimination performance by J. J. Randolph, 139
The effect of extended acquisition upon the replacement capacity of intertrial reinforcement by P. A. Pratt and J. Halpern, 203
Partial reinforcement and response reversal in rats by J. Dutch, 209
High performance obtained with no reward by L. Paul, 224
The reinstatement effect: Amount of noncontingent reward in the runway by P. E. Campbell, D. L. Fixsen, and E. Phillips, 228
Reward-punishment relationships by R. S. Beecroft, B. M. Kruger, and B. G. Fisher, 230
Contingent and noncontingent response rates as a function of delay of reinforcement by M. P. Silver and C. H. Pierce, 231
The influence of illumination upon the temporal patterning of responses in squirrel and owl monkeys by W. Isaac, 243

SOCIAL BEHAVIOR

The influence of specific group membership upon individual performance in a "social problem" for rats by H. Oldfield-Box, 39
Altruistic behavior in the albino rat by J. T. Greene, 47
Opportunity for aggression as a reinforcer in mice by A. Tellegen, J. M. Horn, and R. G. LeGrand, 104
Running speed in the dominance tube by J. F. Brennan, 118
Further observations on social dominance in mice by G. Lindzey, D. Thiessen, S. Blum, and A. Tucker, 245

PERCEPTION AND PERFORMANCE

Comments on "Experience with congruity in the perception of incongruity" by L. Harris, 78
Reply to Harris' comments on "Experience with congruity in the perception of incongruity" by M. S. Lindauer, 79

VISION

Backward masking: Facilitation through increased target-field luminance and duration by D. G. Purcell, A. L. Stewart, and W. N. Dember, 87
Lateral eye movement, reading speed, and visual attention by P. Bakan and R. L. Shotland, 93
The effect of frequency on the auditory evoked response by T. R. Evans and B. H. Deatherage, 95
Sequential blanking and visual form perception by A. Bell, R. G. Forster, F. J. Finnegan, M. Katz, J. I. La Susa, and M. S. Mayzner, 103
The effects of line length on sequential blanking by W. H. Buchsbaum and M. S. Mayzner, 111
Effects of discrimination difficulty on the identification of different types of visual forms by J. B. Thurmond, 193
Failure to replicate a reported U-shaped visual masking function by C. W. Eriksen and P. H. Marshall, 195
The effect of change in body orientation upon the perceived direction of autokinesis by L. Brosgole and K. H. Hansen, 204
Visual temporal discrimination: A point of order by C. E. Sherrick, 218
Visual form perception: Task demands and congruence among spatial solutions by L. S. Aiken and D. R. Brown, 219
The effect of KR on ratings of pattern similarity by R. L. Breckenridge, W. C. Rankin, and A. D. Wright, 223
Necker cube reversibility and perspective dominance as a function of rotation and retinal disparity by R. H. Cormack and R. L. Upchurch, 305
Perceived size of off-size familiar objects under normal and degraded viewing conditions by S. S. Franklin and N. L. Erickson, 312
Effects of figural complexity on the identification of different solid and outlined shapes by J. B. Thurmond and J. B. Hancock, 315
Expected scores in the Rod-and-Frame Test: Field dependence is where you find it by C. W. Neville, Jr., S. N. Workman, and D. T. Johnson, 321

PAIN

Age and the perception of pain by D. R. Haslam, 86
Self-paced and irregular methods of subjective estimation of pain by J. A. Menzer, R. P. Smith, and L. S. Caldwell, 287

PERFORMANCE

Effect of reward on speed of coding for normal and hearing-impaired children by L. L. Elliott and A. B. Vegely, 73
The effects of strength of competing responses during conflict by D. R. Yelen, 80
An attempt to relate test anxiety and Palmar Sweat Index by S. B. Scott and M. Kessler, 90
Some uses and abuses of electrodermal measures by J. J. Furedy, 98
Effects of praise and censure on normal Ss' performance on a psychomotor task by B. R. Gounard, 99
Sequential dependencies and children's stimulus alternation by F. M. Rabinowitz, 189
Presentation time and the intuitive estimation of means by P. M. J. Bulger, D. R. Hiles, and G. Lowe, 191
Children's response alternation as a function of stimulus duration, age, and trials by F. D. Miller, J. Dee-Wang Tu, G. H. Moffat, and S. Manley, 199
The effect of time, shock stimulation, and stimulus uncertainty on the non-associative GSR by R. F. Cook, 209
The effect of sleep deprivation on frequency components of the averaged evoked potential by H. Weinberg, 279
Heart rate and skin conductance responding during three attention-direction tasks by R. Buck, R. E. Miller, and W. F. Caul, 291
Effects of signaled time-out from and loss of monetary reinforcement on human operant behavior by I. A. Trenholme, A. Baron, and A. Kaufman, 295
Performance as a function of payment, commitment, and task interest by R. Heslin and B. Blake, 323

PSYCHOPHYSICS

Apparent order and stimulus uncertainty by P. Bertelson and F. Tisseyre, 65
Subjective intensity of a familiar liquid substance—coffee by L. A. Stone and R. E. Harder, 105
Judgment of minimal aversion thresholds and tolerance levels in two modalities by R. Sullivan and N. Freimark, 107
Absolute time estimates as a function of complexity and interruption of melodies by J. Yeager, 177
Subject difference in exponents from circle size, numerousness, and line length by S. J. Rule, 284
Familiarity vs novelty in desire to own long-play recordings by R. J. Harris, 290
Temporal ROC curves and the psychological moment by J. Baron, 299
Variability of signal detection measures with noise type by P. H. McCann, 310

HUMAN LEARNING AND THINKING

LEARNING

The interaction of response M and %ORM in paired-associate learning by D. R. Yelen and D. Yelen, 75
What is one-trial learning? by L. Brosgole, A. F. Contino, and K. H. Hansen, 89
Perceptual learning in pattern discrimination tasks with two and three schema categories by B. R. Brown and S. H. Evans, 101
Imagery ability in paired-associate and incidental learning by C. H. Ernest and A. Paivio, 181
Facilitation of paired-associate learning by language context by M. Wind and M. Davidson, 184
Transfer of response from compound conditioned stimuli by W. W. Grings, 187
Response mode as a determinant of transfer from serial to paired-associate learning by W. R. Salafia, 197
Monitoring eye movements during PA learning under three display conditions by P. D. McCormack, G. D. Clemence, W. H. Tymm, and M. A. Malabre, 277
Probabilistic discrimination learning of a sequential reinforcement pattern by S. E. Buggie, 309
On Rock's one-trial learning controversy by R. L. Breckenridge and E. W. Kooker, 313
Probability tracking of a linear periodic reinforcement schedule by S. E. Buggie, 318

MEMORY

Vividness of adjectives and the recall of meaningful verbal material by E. P. Kirchner, 71

Short-term memory and acoustic similarity by J. A. Adams, H. I. Thorsheim, and J. S. McIntyre, 77

The effects of grouping instructions in short-term memory by J. M. Furukawa, M. M. Suydam, and S. Miller, 81

The arousal-retention interval interaction revisited: The effects of some procedural changes by R. Kaplan and S. Kaplan, 84

Transfer from free-recall pair learning to free-recall sentence learning by J. H. Crouse, 179

Repetition versus imagery instructions in the short- and long-term retention of paired-associates by J. A. Schnorr and R. C. Atkinson, 183

Retrieval cues and meaningfulness in short-term recall by T. O. Nelson, 202

Short-term memory: Are item and position information stored independently? by G. Cumming and M. Coltheart, 216

Recognition memory for sentences of varying length by A. J. Wearing, 221

Retroactive inhibition and extended recall time by J. P. Houston, 282

Are recall and recognition independent retention processes? by A. F. Grasha, 285

Bidirectional associations in multi-trial free recall by R. C. Anderson and G. H. Watts, 288

Learning and recall differentiated in serial learning by S. C. Woods and M. L. Epstein, 297

Taxonomic categories and proactive interference in short-term memory by M. T. Turvey, J. J. Cremins, and T. Lombardo, 307

VERBAL PROCESSES

The effects of intertrial activity and locus of control orientation on verbal operant conditioning by R. A. Baron, 69

Extinction versus counterconditioning for the meaning of words and nonsense syllables by A. Miller, M. Gimpl, and R. McCrimmon, 92

Retention and utilization of mediators by retardates by J. G. Borkowski, J. P. Ahearn, and J. Pearson, 96

Some properties of the verbal transformation (VT) effect by G. B. Kish and M. E. Ball, 211

Response availability, sex, academic ability, and academic achievement within a college population by E. P. Kirchner, 281

Facilitative effects of verbal pretraining and checklist availability upon idea production by W. E. Roweton, 301

PROBLEM SOLVING AND CONCEPT FORMATION

Evidence that 'thinking aloud' constitutes an externalization of inner speech by J. Benjafield, 83

Rate of concept identification and the noticeability of the relevant dimension by K. N. Clayton, C. T. Merryman, and T. B. Leonard III, 109

The effect of number of attribute-values in conjunctive concept identification by F. L. Slaymaker and I. D. Nahinsky, 213

Language patterns in conjunctive concept identification by W. C. Penrod and I. D. Nahinsky, 322

SOCIAL PROCESSES

The effects of prior training to imitate or nonimitate on subsequent susceptibility to social influence by R. A. Baron, 67

Mixed social structures: Strain and probability ratings by R. B. Horsfall and N. M. Henley, 186

Effects of hunger on responses to demand characteristics in the measurement of persuasion by I. Silverman and A. D. Shulman, 201

Relative costs and reactions to threats by S. Lindskold, T. Bonoma, and J. T. Tedeschi, 205

The effectiveness of several types of ingratiation techniques following argument by D. L. McMillen and R. L. Helmreich, 207

A comparison of the socially influenced behavior of college students and college-age dropouts by F. Sistrunk, 214

Equity and inequity as a source of reward and punishment by T. L. Radinsky, 293

The ethical shift in the Prisoner's Dilemma Game by S. Lindskold, J. Gahagan, and J. T. Tedeschi, 303

Trait similarity and trait evaluation as correlates of attraction by A. Tesser, 319

PHYSIOLOGICAL PSYCHOLOGY

Genetic predisposition to stomach ulceration in emotionally reactive strains of rats by A. A. Mikhail, 245

Absence of change in some measures of cortical morphology in dark-reared adult rats by J. A. R. Boas, R. L. Ramsey, A. H. Riesen, and J. P. Walker, 251

BRAIN LESIONS

Qualitative differences in the maze performance of rats with septal lesions by P. Ellen and G. Bate, 5

The effects of medial ventral lesions on avoidance learning by J. Mottin and J. Gaito, 12

Effects of choice point lights on T-maze performance by caudate lesioned rats by W. L. Mikulas, 132

Neural control of feeding behavior in the pigeon by H. P. Zeigler, H. L. Green, and H. J. Karten, 156

Retention of a geotaxic discrimination task following septal lesions in rats by T. L. Holdstock and A. Edelson, 169

Impaired acquisition of a successive visual pattern discrimination following hippocampal ablations in cats by A. A. Buerger, 255

ELECTROCONVULSIVE SHOCK

Extinction in a passive avoidance task and its interaction with electroconvulsive shock by F. Robustelli, A. Geller, and M. E. Jarvik, 139

Memory and the extensor phase of convulsions induced by electroconvulsive shock by R. R. Miller and N. E. Spear, 164

INTRACRANIAL STIMULATION

Current contrast during hypothalamic self-stimulation by M. J. Gerben, 3

Intracranial reinforcement: Performance decrements as a function of stimulus parameters by T. W. Westcott, L. D. Reid, and R. E. Wasden, 147

Hippocampal disruption and passive avoidance behavior by R. L. Brunner and R. R. Rossi, 228

Biochemical blockade of cholinergic thirst by R. A. Levitt, 274

DRUG EFFECTS

Drug-motivated behavior: The effect of morning glory seeds on motor activity of chicks by D. W. Matheson and J. Thomas, 39

Choice bias from unilateral cortical depression by E. G. Greene and J. Adkins, 43

Magnesium Pemoline: Effects on brightness discrimination using positive reward by J. G. Bridge and G. I. Hatton, 52

Behavior of infant rhesus monkeys with thalidomide-induced malformations: A pilot study by D. G. Lindburg, 55

Attenuation of schedule-induced polydipsia by trihexyphenidyl by J. D. Keehn and M. Nagai, 61

Postreinforcement synchronization: Quantitative analysis of amphetamine effects by A. J. Rosen, 113

The effects of scopolamine hydrobromide on passive avoidance learning in rats by E. Suits and R. L. Isaacson, 135

Ventricular modification in carbachol-induced drinking: Reply to Routtenberg by K. A. Khavari, 145
Disinhibition effect of chlordiazepoxide by P. W. Wedeking, 232
Dieldrin exposure and vigilance behavior in sheep by B. E. Sandler, G. A. Van Gelder, D. D. Elsberry, G. G. Karas, and W. B. Buck, 261
The toxic effects of three different dosages of pentobarbital sodium on the Long-Evans rat by T. B. Collins, Jr., 276

BIOCHEMICAL FACTORS

Blood pH as a possible hunger cue: Negative evidence by R. D. Beaton, 247
Specific and general factors in biochemical transfer of memory by A. R. Allen, R. J. Grissom, and C. L. Wilson, 257
Ribonucleic acid and the acquisition of instrumental conditioning in rats by H. Matte-Grenier and G. Malcuit, 265

ANIMAL PSYCHOLOGY

MOTIVATION

Schedule-induced nitrogen "drinking" in the rat by D. B. Taylor and D. Lester, 17
Thirsty rats do prefer sucrose solutions by R. C. Beck and R. Nash, 19
Schedule-induced polydipsia: A partial reinforcement effect by J. L. Mottin, 26
Stress and water consumption in a reptile by I. M. Spigel and A. Ramsay, 29
The concomitancy in the rhythms of caloric intake and behavior in cats: A replication by W. L. Randall and V. L. Parsons, 35
A note on the caloric values of Purina chow and Noyes pellets by F. P. Valle, 38
Polydipsia in the pigeon by M. E. Shanab and J. L. Peterson, 51
Stability of preference for saline in rats over days by J. E. Grace, 59
Deprivation time and the initiation of drinking by G. I. Hatton and W. R. Ives, 63
Schedule-induced polydipsia: Effect of providing an alternate reinforced response and of introducing a lick-contingent delay in food delivery by E. F. Segal and D. L. Oden, 153
Do rats drink water in excess of apparent need when they are given food? by S. Hsiao and M. A. Lloyd, 155
Relative intake of saccharin and water on a restricted drinking schedule by D. J. Navarick and A. Strouthes, 158
Alcohol consumption in rats after experimentally induced neurosis by J. J. Persensky, R. J. Senter, and R. B. Jones, 159
Alcohol ingestion without oropharyngeal sensations by Z. Amit and M. H. Stern, 162
The effects of pinealectomy on the activity levels in rats by N. R. Remley, D. M. Bryon, and F. R. Wilson, 175
Social feeding in domestic chicks: Effects of food deprivation of nonfeeding companions by C. W. Tolman, 234
An enlarged study of genotype and recovery of sex drive in male mice by T. E. McGill, 250
Saline appetite in rats as a function of dry food ingestion by S. Hsiao and P. Bosse, 254

SENSES

The effect of chromatic surround upon generalization along an angularity dimension in pigeons by M. R. Baron and E. L. Bresnahan, 9
Stimulus density (complexity) preference in rats differing in early visual and tactual stimulation by G. Becker and C. L. Lorr, 115
Visual cliff behavior of rats as a function of pattern size by D. C. DeHardt, 268
The absolute behavioral taste threshold for sodium saccharin in the rat by J. S. Stumphauzer and R. A. Williams, 272

CONDITIONING

Auditory differential conditioning of the rabbit nictitating membrane response: I. Effects of mixed- and separate-phase training by P. O'Malley, R. B. Hupka, and J. W. Moore, 123
Auditory differential conditioning of the rabbit nictitating membrane response: II. Effects of interstimulus interval and cue similarity by D. C. Chisholm, R. B. Hupka, and J. W. Moore, 125
Auditory differential conditioning of the rabbit nictitating membrane response: III. Effects of US shock intensity and duration by A. B. Ashton, S. C. Bitgood, and J. W. Moore, 127
Auditory differential conditioning of the rabbit nictitating membrane response: IV. Training based on stimulus offset and the effect of an intertrial tone by S. S. Liu and J. W. Moore, 128
Auditory differential conditioning of the rabbit nictitating membrane response: V. Stimulus generalization as a function of the position of CS+ and CS− on the frequency dimension by R. B. Hupka, S. S. Liu, and J. W. Moore, 129

DISCRIMINATION LEARNING

Effect of deprivation level on span of attention in a multi-dimension discrimination task by J. S. Cohen, L. J. Stettner, and D. J. Michael, 31
Conditional discrimination in the squirrel monkey by E. M. Barge, Jr., and R. K. Thomas, 161
Selective attention and complex discrimination learning in the Japanese quail (*Coturnix coturnix japonica*) by F. G. Fidura, 167
Performance of "maze-bright" and "maze-dull" rats on an automated visual discrimination task by H. Markowitz and J. M. Sorrells, Jr., 171
Effects of overtraining on intra- and extra-dimensional shifts by N. S. Sutherland and L. Andelman, 253

MAZE BEHAVIOR

Olfactory cues and spontaneous alternation behavior by C. L. Richman, P. Juels, P. Peckinpaugh, and R. M. Stutz, 23
Memory transfer in meal-worms by P. O. Peretti and H. G. Wakeley, 33
Runway behavior of the rat as a function of intersubject reward contingencies and constancy of daily reward schedule by H. W. Ludvigson, 41
Subject-to-subject trial sequence, odor trails, and patterning at 24-h ITI by A. Amsel, J. J. Hug, and C. T. Surridge, 119
Utilization of visual and tactual cues by the white rat in following a trail by D. A. Sisemore and H. C. Wilcoxon, 151

AVOIDANCE AND PUNISHMENT

Lever-holding and the operant nature of escape responding by A. S. Marriott and I. S. Russell, 1
Self-punitive behavior in the rat: A free-operant demonstration by M. G. Wells and H. K. Merrill, 7
Development and maintenance of FR escape with titrated reinforcement by J. Khalili and C. Cheney, 10
Response suppression in the CER paradigm with extinction as the aversive event by A. Kaufman, 15
Temporal vs discriminative factors in the maintenance of conditioned suppression: A test of the information hypothesis by C. Scheuer and W. H. Keeter, 21
Aversive stimulation and reversal learning by J. J. O'Malley and J. L. Bruning, 40
Learning to resist mild or intense shock punishment and subsequent resistance to airblast punishment by W. Terris and D. K. Rahhal, 45
Learned resistance to punishment and subsequent responsiveness to the same and novel punishments by W. Terris and M. Barnes, 49

Preconditioning CS exposure: Variation in place of conditioning and of presentation by D. C. Anderson, T. O'Farrell, R. Formica, and V. Caponigri, 54
Memory storage: The first posttrial hour by D. J. Zerbolio, Jr., 57
Sensory preconditioning of cats in a shuttle box avoidance situation by J. L. Davis and R. F. Thompson (Vol. 13, pp. 37-38)
Erratum, 142
Avoidance conditioning in Limulus by G. S. Wasserman and D. G. Patton, 143
Effects of shock on mirror reinforced behavior of *Betta splendens* by J. G. Grabowski and T. Thompson, 173
Varying temporal relationship of an intruded aversive stimulus with time-out from responding by A. G. Snapper and E. H. Shimoff, 229
Shock-induced response bursts and suppression by K. M. Weiss and K. T. Strongman, 238
Avoidable punishment and self-punitive behavior by R. S. Beecroft and B. G. Fisher, 243
Escape from punishment by omission of responding by K. A. Lattal and A. M. Cooper, 263
The intermittent punishment effect: A replication with improved controls by R. M. Kinler and R. K. Banks, 267
Temporal uncertainty of reinforcement by F. L. Royer, 269

REINFORCEMENT

Effects of reinforcement shifts upon subsequent saccharin consumption by R. Gandelman and J. A. Trowill, 25
Replacement function of intertrial reinforcement by R. F. Berg, J. F. Connelly, and P. H. Duerfeldt, 37
A failure to obtain disinhibition in fixed-interval operant conditioning by A. H. Wolach and D. P. Ferraro, 47
Effects of visual pattern restriction on sensory reinforcement in the rat by D. Singh, R. J. Johnston, and W. S. Maki, Jr., 117
Magnitude of negative contrast effect in relation to drive level by E. A. Cleland, M. Y. Williams, and V. Di Lollo, 121
Novelty as a basis for the reinforcing effects of saccharine by N. Levy and D. R. Turner, 133
Magnitude of the frustration effect and number of training trials by D. Yelen, 137
The partial reinforcement effect after minimal acquisition: Single pellet reward, spaced trials by G. McCain, 146
Effects of concurrent exposure to different food and sucrose rewards in differential conditioning by J. R. Ison and D. H. Glass, 149
Varying temporal placement of response-produced stimuli in a fixed-interval schedule by D. A. Eckerman and D. P. McGourty, 225
Differential reinforcing effects of steady and flickering light on bar pressing in the rat by G. Lowe and D. I. Williams, 231
Effect of instrumental response pretraining in classical-to-instrumental transfer of a differential reward magnitude discrimination by C. F. Flaherty and J. W. Davenport, 235
Response duration differentiation during fixed ratio responding by M. H. Kellicutt and P. M. Salzberg, 237
Three-level differential reward magnitude discrimination in rats by C. F. Flaherty and J. W. Davenport, 241
Absolute sucrose incentive reduction: Frustration or demotivation? by R. E. Prytula and W. G. Braud, 249
Time-out from a short mean-interval variable-interval reinforcement schedule by J. B. Carman, 259
Partial delay of reinforcement: Effects of D-length, number of different D-lengths and number of reinforcements on resistance to extinction by J. M. Cole and J. B. McGovern, 271

SOCIAL BEHAVIOR

Predatory behavior in two strains of laboratory mice by K. Thomas, 13
Early-handling and social-rearing effects on dominance-subordination behavior in the adult rat by G. Becker and G. Ezinga, 27
Stimulus control of prey attack in naive rat snakes: A species duplication by D. D. Morris and M. S. Loop, 141
Independence of parturition and mouse-killing by female rats by R. Baenninger, 144
Avoidance of a distressed conspecific by V. E. Evans and W. G. Braud, 166

PHYSIOLOGICAL PSYCHOLOGY

BRAIN LESIONS

Comparison of hyperemotionality caused by lesions in the septal and ventromedial hypothalamic areas in the rat by D. Singh, 3

Septal lesions enhance delay of responding on a free operant avoidance schedule by J. M. Morgan and J. C. Mitchell, 10

The effects of bilateral septal lesions on two-way active avoidance in the guinea pig by B. A. Lown, W. N. Hayes, and R. E. Schaub, 13

Development of post S^R and post non S^R DRL performance and its retention following septal lesions in rats by J. M. MacDougall, G. W. Van Hoesen, and J. C. Mitchell, 45

Escape and avoidance conditioning of responses in the plegic arm of stroke patients: A preliminary study by L. P. Ince, 49

Latent learning in rats with hippocampal lesions by L. W. Means, 51

Effect of amygdaloid lesions in a fear conditioning situation not involving instrumental learning by M. G. Gaston and L. Freed, 55

Septal lesions and male rat copulatory behavior by E. D. Goodman, B. N. Bunnell, D. A. Dewsbury, and B. Boland, 123

Response inhibition of rats with medial and lateral septal lesions by R. L. Agnew and M. E. Meyer, 231

Tactile transfer and neonatal callosal section in the cat by M. A. Jeeves and A. F. Wilson, 235

A comparison of interhemispheric transmission times in callosals and normals by M. A. Jeeves, 245

Enhanced pattern discrimination learning following unilateral damage to posterior cortex in rats by T. J. Boles and C. L. Sheridan, 273

BRAIN STIMULATION

Cortical polarization effects on consolidation of avoidance learning in rats by S. D. Berry, D. G. Sim, and C. W. Snyder, 20

The effect of intertrial interval on running performance by J. Panksepp, R. Gandelman, and J. Trowill (Vol. 13, pp. 135-136) Comment on Panksepp et al by C. R. Gallistel, 25

Reply to Gallistel by J. Panksepp, R. Gandelman, and J. A. Trowill, 26

An attempt to establish extinction-elicited aggression by withholding rewarding electrical stimulation of the brain by R. Gandelman, A. B. Ashton, and J. Trowill, 43

Electrically induced affective attack from the hypothalamus of the albino rat by J. Panksepp and J. Trowill, 118

Drinking following carbachol stimulation of hippocampal formation of lateral ventricles by D. Mountford, 124

Effect of unconditioned stimulus linked subconvulsive current in chicks by T. A. Weaver and J. G. Magnus, 265

DRUG AND BIOCHEMICAL EFFECTS

Effect of hour of operation on feminization of neonatally castrated male rats by C. N. Thomas and A. A. Gerall, 19

Chronic effects of social stimuli on adrenocortical function in male mice by J. Archer, 23

Drug effects on mouse exploratory behavior by H. G. Wakeley and D. O'Sullivan, 27

Effects of the marihuana homologue, pyrahexyl, on food and water intake and curiosity in the rat by E. L. Abel and B. B. Schiff, 38

Effects of the marihuana homologue, pyrahexyl, on a conditioned emotional response by E. L. Abel, 44

On the behavioral effects of bilateral glossopharyngealectomy in mice by C. L. Scudder and D. Richardson, 141

Amphetamine depression of a multiple CRF-EXT operant schedule: A sex comparison by S. O. Cole, 143

Effects of atropine on heart rate and hippocampal EEG following septal stimulation in rats by B. M. Chalmers and T. L. Holdstock, 145

The effect of atropine and methyl atropine on the heart rate of rats by T. L. Holdstock and H. B. Ingle, 149

Chlorpromazine slows decay of visual short-term memory by G. C. Stone, E. Callaway III, R. T. Jones, and T. Gentry, 229

An effect of yeast RNA on behavior by D. Mountford and J. R. Heslip, 237

ANIMAL PSYCHOLOGY

The effect of environmental movement upon the duration of tonic immobility in bobwhite quail by R. L. Doty, 48

EMOTION

Early cold stress and emotional reactivity in BALB/c mice: A brief note on Schaefer's temperature hypothesis by R. C. LaBarba, R. Hodges, and J. Geraghty, 122

Maternal aggression: A failure to replicate by R. Revlis and K. E. Moyer, 135

Attack behavior in a multiple fixed-ratio schedule of reinforcement by R. K. Flory, 156

Aggressive motivation in Betta splendens: Replication and extension by L. Baenninger, M. Bergman, and R. Baenninger, 260

MOTIVATION

Self-administration of Pentobarbital by means of schedule-induced polydipsia by R. A. Meisch, 16

Effects of a conditioned taste aversion on schedule-induced polydipsia by D. Roll, R. W. Schaeffer, and J. C. Smith, 39

Transformation of polydipsic drinking into operant drinking: A paradigm? by E. F. Segal, 133

Behavioral thermoregulation at high environmental temperatures: The intra-session pattern of cooling and resting by D. A. Kristt and J. A. Sechzer, 151

Effects of blood-glucose levels on wheel-running activity of food-deprived rats by L. F. Jakubczak, 157

Operant drinking behavior and the prediction of instrumental performance by A. Langford, L. Benson, and R. G. Weisman, 166

The passage of food through the gut of rats and its uptake of fluid by K. Oatley and F. M. Toates, 225

SENSES

A comparison of uni-dimensional and bi-dimensional generalization testing in pigeons by M. D. Svinicki and D. R. Thomas, 22

The regulation of cliff responses in the Mongolian gerbil *(Meriones unguiculatus)* by visual and tactual cues: I. by A. Collins, G. Lindzey, and D. D. Thiessen, 227

Early experience and visual cliff behavior in the Mongolian gerbil *(Meriones unguiculatus)*: II. by D. D. Thiessen, G. Lindzey, and A. Collins, 240

Depth and distance perception in the Mongolian gerbil by J. M. Cole and J. S. Topping, 271

Deprivation changes initial affective value of sodium saccharin by E. R. Bauer, 275

Pinnae movement as related to auditory intensity in gerbils by L. G. Lippman and R. A. Galosy, 276

CONDITIONING

Second-order fear conditioning as revealed through augmentation of a startle response: Part I by D. C. Anderson, D. Johnson, and and H. Kempton, 5

Second-order fear conditioning as revealed through augmentation of a startle response: Part II by D. C. Anderson, D. Johnson, and H. Kempton, 7

Imprinting in guinea pigs by M. G. Gaston, R. Stout, and R. Tom, 53

Classical and avoidance conditioning of the nictitating membrane in frogs (Rana pipiens) and toads (Bufo americanus) by R. M. Yaremko, R. Boice, and R. W. Thompson, 162

Discriminative classical conditioning of excitement anticipatory to food reward by E. Zamble and R. Kirkwood, 252

DISCRIMINATION LEARNING

Synthesis of double alley and discrimination phenomena: Apparent positive S^+ contrast in differential conditioning by E. R. McHewitt, R. S. Calef, F. R. Maxwell, Jr., P. A. Meyer, and J. H. McHose, 137

A demonstration of overshadowing in operant conditioning by C. G. Miles, 139

Learning set without transfer suppression: A replication and extension by A. M. Schrier, 263

The effect of discrimination training on generalization of conditioned suppression by P. M. Duncan and N. C. Duncan, 267

Cross-modal transfer of a specific discrimination in the rabbit by A. L. Yehle and J. P. Ward, 269

MAZE BEHAVIOR

Motivation and learning in a water maze by C. Consalvi, 34

Gerbil runway performance under hunger motivation by J. H. Reynierse, M. J. Scavio, Jr., and J. D. Ulness, 36

Odor cues in a maze discrimination by P. F. Southall and C. J. Long, 126

Odor trails and spontaneous alternation by A. Still and A. MacMillan, 160

A note on spontaneous alternation behavior by C. L. Richman and M. Tessnear, 233

The effects of drive level on cues utilized in spontaneous alternation by R. E. Franken and J. G. Baker, 239

Biometrics of reversal learning in mice: I. Effects of ITI and strain by A. B. Carran, 248

Reversal learning in the sow bug by J. W. McDaniel, 261

AVOIDANCE AND PUNISHMENT

The effects of an escape contingency upon running wheel and one-way avoidance learning by R. C. Bolles, N. E. Grossen, and G. E. Hargrave, 33

Stimulus compounding with an instrumental avoidance response by L. Miller, 46

CS-US interval and conditioned fear facilitation of shuttle box avoidance learning in the goldfish by K. H. Brookshire and K. Frumkin, 115

Forced activity and conflict behavior by U. Rauter and W. Braud, 117

Escape from punishment by omission of responding by K. A. Lattal and A. M. Cooper (Vol. 15, pp. 263-264)
Erratum, 140

Task and species generality of the "helplessness" phenomenon by W. Braud, B. Wepman, and D. Russo, 154

Conditioned fear training and later avoidance learning in the goldfish by K. Frumkin and K. H. Brookshire, 159

The placement of shocking electrodes for escape and avoidance learning in fish by F. T. Severin, 244

The role of discontinuous US in discriminated avoidance learning by G. B. Biederman, 246

Effects of UCS intensity during continuing coterminous delay conditioning on conditioned acceleration during maintained avoidance by D. Riess and L. K. Martin, 251

Two-way shuttle avoidance in wild and domesticated mice by R. W. Powell, 258

REINFORCEMENT

Behavioral thermoregulation at high environmental temperatures: Effect of variation in intensity of heat stimulus and magnitude of reinforcement by D. A. Kristt and J. A. Sechzer, 1

The effect of deprivation upon fixed ratio responding by R. W. Powell, 17

Contrast effects and delay of reward in the double alleyway by J. A. Sgro, R. A. Glotfelty, and J. A. Podlesni, 29

The magnitude of the frustration effect as a function of the number of previously reinforced trials by D. T. Stimmel and P. C. Adams, 31

Activity following partially reinforced trials: Evidence for a residual frustration effect due to conditioned frustration by G. G. Gallup, Jr., and G. K. Hare, 41

Paper as a positive reinforcer for acquisition of a bar press response by the golden hamster by P. E. Jansen, E. D. Goodman, D. Jowaisas, and B. N. Bunnell, 113

Patterns of responding in a chained schedule altered by conditioned reinforcement by D. W. Zimmerman, 120

Varied reward sequence and resistance to extinction in the straight alley by D. W. Leonard, 129

Performance under massed or spaced extinction following different sequences of varied reward training by D. W. Leonard, R. Albin, and M. Lebowitz, 130

The effect of prior rewarded goal box placements on incentive reduction behavior by S. F. Davis and A. J. North, 147

Secondary reinforcement based upon time out from avoidance by R. T. Jones, 153

Successive acquisitions and extinctions of discrete bar-pressing in monkeys and rats by J. W. Davenport, 242

Effects of lowering the magnitude of reinforcement on the response rate from a baseline during a successive discrimination by T. J. Kramer and M. Rilling, 249

Positive contrast in instrumental learning from qualitative shift in incentive by M. H. Marx, 254

Operant conditioning in the Mongolian gerbil by N. Campbell, D. Straney, and A. Neuringer, 255

Observation and shaping learning: A comparison using Long-Evans rats by K. E. Jacoby and M. E. Dawson, 257

SOCIAL BEHAVIOR

A pheromone associated with social dominance among male rats by L. Krames, W. J. Carr, and B. Bergman, 11

Fighting in female mice as a function of the size of the opponent by M. White, S. Mayo, and D. A. Edwards, 14

Social dominance in gerbils and hamsters by R. Boice, D. Hughes, and C. J. Cobb, 127

Assessing social dominance in pairs of male rats by measuring weight gain by K. T. Hoyenga and T. C. Rowe, 165

Relationship of the upright agonistic posture in the foot shock situation to dominance-submission in male C57BL/6 mice by G. McA. Kimbrell, 167

PERCEPTION AND PERFORMANCE

Lengthening of time estimates in four different temporal patterns of visual light stimulation by D. A. Ross, 194

SENSES

Effect of extended observation on reversible perspective duration by J. R. Price, 75
Adaptation of the wrist to displacing prisms by A. H. Putterman, A. L. Robert, and A. S. Bregman, 79
The autokinesis of an after-image by L. Brosgole (Vol. 12, pp. 233-234)
Comments on Brosgole by D. G. Pearce, 89
Reply to Pearce by L. Brosgole, 90
Identification and discrimination functions for pure tone auditory frequencies by J. Kopp and H. Udin, 95
Estimates of "SVE" processing time by M. E. Tresselt and M. S. Mayzner, 103
Discrimination between nutriments by the human neonate by J. Dubignon and D. Campbell, 186
Orientations called "right-side up": Effects of stimulus alignment by C. E. Moeller and J. J. Goodnow, 213
The effects of stimulus hue on backward masking under conditions of monoptic and dichoptic stimulus presentation by L. W. Teft, 287
The effects of an irrelevant stimulus variable on transposition by N. W. Dahlem, 291
Identification and localization within digit and letter spans by M. J. White (Vol. 14, pp. 279-280)
Erratum, 307
Simultaneous brightness contrast as a function of repeated trials by G. McClure and K. Smith, 314
Generalization of a voluntary response as a function of presentation frequency of the training stimulus in testing by J. A. Hebert and J. E. Capehart, 315

PERFORMANCE

Extinction of conditioned electrodermal changes and human information processing by V. Pishkin and J. T. Shurley, 86
Arousal as a function of background factors in psychological experiments by S. Kaplan and K. Winter, 107
Changes in heart rate as a function of an unconditional stimulus presented under varying conditions of certainty by A. H. Shapiro and W. D. Fenz, 177
Extended sleep and performance: The Rip Van Winkle effect by J. M. Taub and R. J. Berger, 204
Pupillary response and galvanic skin response during an imagery task by F. D. Colman and A. Paivio, 296
Cross-sex and cross-educational level performance in a color-word interference task by P. O. Peretti, 321
The effect of stimulus intensity on induced crying activity in the neonate by V. R. Fisichelli and S. Karelitz, 327
Palmar sweating and control of danger by J. M. Dabbs, Jr., H. Leventhal, and F. W. Hornbeck, 329
Perceptual defense or set: A re-examination by D. G. Cable, 331

PSYCHOPHYSICS

The effect of information feedback and reference tones on d′ and L_X: A further analysis of Nash and Adamson's data by W. C. Clark, 93
Scaling apparent distance in natural indoor settings by M. Teghtsoonian and R. Teghtsoonian, 281

HUMAN LEARNING AND THINKING

The effects of cognitive processes on skin conductance reactivity to an aversive film by D. C. Glass and P. Mayhew, 72

CONDITIONING

The cognitive factor in the extinction of a conditioned GSR by P. S. Hall and C. R. Prior, 74
Cognitive and learning effects in the production of GSR conditioning data by D. McComb, 96
Counterconditioning, neutral conditioning, and extinction effects for the meaning of nonsense syllables by A. Miller and N. Clark, 297
Paired associate learning predicted from indices of free association strength by S. J. Brotsky and M. L. Linton, 305

REINFORCEMENT

Reward schedule, response measure, and attentional deficiency: A reanalysis by P. Watson, 70
Galvanic skin reactions associated with nonpresentation of an accustomed valued object in humans by M. Weil and E. S. Katkin, 171
Effects of rewarding children's high- and low-amplitude motor responses by G. N. Cantor and J. H. Whiteley, 211

DISCRIMINATION LEARNING

Size generalization in children as a function of test method and age by J. S. Landau, 57
Presentation mode differences in the auditory discrimination of retarded children by J. Smith, 65
Effects of sensory deprivation on discrimination learning by V. Hays and L. Gagnon, 78
Probability learning in a context of transient stimuli by M. Goldstein and J. Zuckerberg, 176
Differential training in multiple probability-learning and decision-making by L. M. Schipper, 179
Electromyographic gradients during complex visual discrimination learning by A. O. Vaughn and J. W. McDaniel, 203
Effect of variations in a reinforcement complex upon reversal shift performance of kindergarten children by W. Viney, W. Boyer, and Wynona Viney, 206
Dimensional preference and shift option by N. W. Dahlem and L. J. McLaughlin, 279
Reversibility in nonconservation of weight by F. B. Murray and P. E. Johnson, 285
Compound stimulus transfer by W. W. Grings and A. Zeiner, 299
Probability learning with words by B. L. Hanson, L. M. Schipper, and R. W. Brislin, 300
Vocalizing choice prior to responding hinders discrimination learning by S. L. Carmean and C. R. Bauman, 303
Semantic factors in conservation of weight by S. G. Nummedal and F. B. Murray, 323
Influence of pattern variance and overt responding on subjective categorization in a two-schemata SCF task by M. A. Hastings, D. F. Dansereau, and T. R. Dixon, 325

VERBAL LEARNING

The effect of verbal organizations on the location of subjects' errors in serial learning by J. R. Levin, 61
Natural language mediation and interitem interference in paired-associate learning by J. A. Adams, J. S. McIntyre, and H. I. Thorsheim, 63
The effect of post-test relevant pre-tests and discussion-type feedback on learning and retention by S. J. Samuels, 67
Paired-associate learning as influenced by birth order and the presence of others by J. M. Innes and J. E. Sambrooks, 109
The learning to criterion of a serial list with and without mnemonic instructions by P. S. Delin, 169
Serial structures as response items in paired-associate learning by L. B. Kornreich, A. Kane, and J. Straka, 181
Learning time with a mnemonic system by E. Berla, J. J. Persensky, and R. J. Senter, 207

Acoustic similarity in long-term paired associate learning by H. C. A. Dale and A. D. Baddeley, 209
Visual and pronouncing responses in free recall learning by S. G. Kirshner and L. B. Kornreich, 215
Two kinds of familiarization in tachistoscopic recognition, paired-associate learning, and free recall by W. A. Winnick, 217
Response word frequency in paired-associates learning by S. I. Shapiro, 308
Influence of four input conditions on serial output by J. R. Heslip and L. R. Engelbrecht, 309
Effect of simultaneous presentation of conceptually similar and dissimilar items on paired associate learning by P. S. Sherman and S. C. Brown, 319

MEMORY

Primacy effect in short-term memory in young children by M. Donaldson and H. Strang, 59
Memory loci in artificial memory by H. F. Crovitz, 82
Clustering of related but nonassociated items in free recall by J. F. Fagan III, 92
Memory for individual events in concept identification by L. E. Bourne, Jr., and K. O'Banion, 101
Rule utilization in free recall by C. T. Bersted and T. R. Dixon, 105
Hemisphere function and immediate memory by S. J. Dimond, 111
Associative intrusions in short-term recall: A replication of Wickelgren by T. J. Hefele and J. Liebergall, 173
Rhyme as a determinant of clustering by W. A. Bousfield and D. A. Wicklund, 183
Recognition memory of preschool children for pictures and words by D. A. Corsini, K. A. Jacobus, and S. D. Leonard, 192
Effect of concept grouping and dominance level on free recall by D. M. Roberts and B. S. Randhawa, 198
Free recall of successive lists: Effect of category size and category repetition by C. P. Thompson and D. R. Poling, 201
Further study of encoding and arousal factors in free recall of verbal and visual material by J. R. Sampson, 221
Connotative classification and proactive interference in short-term memory by M. T. Turvey, J. Fertig, and S. Kravetz, 223
Recognition memory as influenced by number of reinforcements and type of test by R. L. Klatzky and G. R. Loftus, 302
Metered memory search by R. J. Weber and J. Castleman, 311
The interfering effect of serial cognitive structures in long-term memory on word-order in short-term memory by D. L. Mosher, 317

VERBAL PROCESSES

The test-retest reliability of free associations following successive associations by S. J. Brotsky and M. L. Linton, 98
Verbal processing in third-grade children by K. A. Jacobus, 175
Transition probabilities and the incidence of filled pauses by M. Cook, 191
The form class of word associations to nominalizations and adjectivalizations by K. Loewenthal, 197
The effect of partially irrelevant anchors on verbal conceptual thinking by M. E. Tresselt, 312

PROBLEM SOLVING AND CONCEPT FORMATION

The effects of perceptual organization on performance in classification tasks by H. D. Fishbein and P. Fingerman, 76
Some psychophysiological and latency correlates of rule induction by M. F. Elias and S. H. White, 84
Decrease in polarity of semantic differential ratings as a function of previous trials with similar materials by W. E. Gumenik, 87
The effect of pronunciation practice on anagram difficulty by R. L. Dominowski, 99
Effects of stimulus modality on reversal and nonreversal concept learning in children by R. Bloom and J. Moore, 188
Effect of an "action" cue on conservation of amount by M. D. Minichiello and J. J. Goodnow, 200
Concept learning: Measured selective attending changes by S. Rydberg, 293

SOCIAL PROCESSES

Contagion of aggression and the number of reinforcements given by a model to an instigator by R. I. Lidman, 69
Effects of a "friendless" model on imitation and prosocial behavior by R. M. Liebert, L. E. Fernandez, and L. Gill, 81
Sex differences in moralism and punitiveness by M. H. Richey and J. J. Fichter, 185
Speech rate as a measure of imitative performance by A. J. Finch, Jr., K. A. Lattal, and H. C. Rickard, 189
Imitation: Modeling and enhancement effects by D. A. Parton and R. A. Dubanoski, 195
Imitative modeling of voice intensity by J. C. Baird and M. Tice, 219
Liking and perceived communication potential as determinants of looking at another by G. N. Goldberg and D. R. Mettee, 277
Anxiety and volunteering by J. C. Barefoot, 283
Negro-white differences in attribution of responsibility as a function of age by M. E. Shaw and F. W. Schneider, 289

Contents of Volume 15
Section on Human Experimental Psychology

PERCEPTION & PERFORMANCE

Relation of mental ability to preference for varying rates of auditory stimulation by J. E. Leri, N. J. Lesswing, and M. F. Elias, 80

Do children really prefer visual complexity? by C. Hutt and P. L. McGrew, 113

SENSES

A contaminating factor in the measurement of geometric illusions by B. P. Christie, 69

Sequential blanking: A function of geometric analyzers in the human visual system by M. S. Mayzner and M. E. Tresselt, 77

An exploration of meaning accompanying active and passive touch without object contact by G. M. Vaught, 83

Visual disppearance of a motion pattern by E. S. Eriksson, 85

Effect on backward masking of spatial separation between target and mask contours and of target size by S. I. Cox, W. N. Dember, and M. F. Sherrick, 205

Apparent movement of sounds: Auditory autokinesis by D. R. Perrott and D. J. French, 207

Visual autokinesis as a function of the amount of "possible" movement by W. F. Daves, M. Kelnhofer, and C. L. Holland, 219

Distance discrimination in a reduced cue setting by J. K. Worley and R. P. Markley, 237

On the relative usefulness of monaural and binaural cues in locating sound in space by R. A. Butler, 245

The nine-dot problem: Beyond perceptual organization by C. A. Burnham and K. G. Davis, 321

Illusions, aftereffects and iconic memory by H. D. Ellis, 328

Location of errors with a post-stimulus indicator by R. N. Haber and L. Standing, 345

Facilitation of visual backward masking by increasing target duration: A methodological extension by D. G. Purcell and A. L. Stewart, 360

PERFORMANCE

Conceptual complexity and internal arousal by J. B. Bryson and M. J. Driver, 71

Classical reaction time and signal rate in a vigilance setting by H.-O. Lisper, 217

A rational equation for predicting search times in simple inspection tasks by C. I. Howarth and J. R. Bloomfield, 225

Persistance of GSR changes as a function of repeated verbal satiation of emotionally-charged words by N. S. DiCaprio and M.-T. Turnock, 238

Information and meaningfulness needs in sensory deprivation by P. B. Landon and P. Suedfeld, 248

Attention in infants as a function of magnitude of discrepancy and habituation rate by R. B. McCall and W. H. Melson, 317

Splitting the normal brain with reaction time by R. A. Filbey and M. S. Gazzaniga, 335

Sex differences in the development of fearfulness: A replication by G. W. Bronson, 367

PSYCHOPHYSICS

Probability matching in signal detection by D. D. Dorfman, 103

Receiver-operating characteristic curves for taboo and neutral words by J. Dandeliker and D. D. Dorfman, 201

Effects of ipsilateral and contralateral shock on ear asymmetry in the detection of two clicks by E. H. Murphy and P. H. Venables, 214

Correcting for compensation in studies of time estimation by M. Arons and H. London, 319

The intuitive estimation of means with auditory presentation by G. Lowe, 331

HUMAN LEARNING & THINKING

Differential effects of interstimulus interval on habituation and recall scores by J. Germana, 73

CONDITIONING

The effects of interpolated rest on the first and second responses of the conditioned GSR by R. F. Cook, 84

Effects of UCS predictability in GSR conditioning by F. A. Hill, 195

Cephalic vasomotor responses as indices of the orienting reflex, the defensive reflex, and semantic conditioning and generalization: A failure to replicate Soviet research by S. J. Brotsky, 228

The effect of verbalization of relevant and irrelevant dimensions on discrimination-shift learning by M. H. Dembo, F. McCain, Jr., and D. H. Hustuft, 231

Effect of the experimenter in human eyelid conditioning by D. P. Gold, 232

Extinction of human eyelid conditioning as a function of components of a masking procedure by R. S. Kessler, C. D. Williams, and N. Schneiderman, 337

Compound stimulus transfer among forward and backward conditioning situations by W. W. Grings and A. Zeiner, 353

DISCRIMINATION LEARNING

An improved discrimination-shift design by N. J. Slamecka, 89

Joint effects of mean and variance of run lengths on a non-feedback probability learning task by J. C. Munson and F. L. Newman, 90

Contribution of instructions to the effects of two types of symbolic reinforcers on the discrimination learning of children by J. T. Spence, J. Armstrong, and R. Conrad, 107

Development of discrimination and oddity learning set in a two-year-old girl by E. D. Neimark and M. Horn, 108

Stimulus coding and selection as a function of response relatedness by J. L. Saff and W. E. Forrester, 199

Fixation and choice selectivity during discrimination transfer by S. Schroeder, 324

VERBAL LEARNING

Paired associate learning predicted from free association strength: An extension by S. J. Brotsky and M. L. Linton, 65

Learning and retention of English words with successive approximations to a complex mnemonic instruction by P. S. Delin, 87

Sound coding in verbal learning with and without restrictions on decoding by W. E. Forrester and N. E. Spear, 91

The effects of mnemonic instruction and list length on serial learning and retention by P. S. Delin, 111

Mediational construction vs mediational perception in paired-associate learning by L. H. Pelton, 220

Associations and recognition learning by G. Wood, 222

Isolation effect based on digit composition of numbers and its stability by S. Slak, 227

Transfer of training as a function of intra-list response similarity and degree of original list learning by M. J. Homzie,

J. Weimer, J. Schwartz, and W. Waters, 243
Free recall learning as related to variability of within-list meaningfulness by L. G. Lippman and J. A. Carlson, 247

MEMORY
Proactive inhibition of prompted items by J. L. Fozard and N. C. Waugh, 67
Reconstitutive memory in kindergarten children revisited by N. W. Dahlem, 101
A reanalysis of "The generality of free recall: I. Subjective organization as an ability factor" by D. S. Gorfein, C. Blair, and C. R. O'Neill, 110
A model for asymmetry of immediate recall in relational triads by L. R. Huesmann, 203
Effects of changes in word length on proactive interference in short-term memory by B. Lachar and J. Goggin, 213
The modality of post-stimulus cueing of recall order in the memory span by J. Morton, 224
The retention of connected discourse presented and recalled under delayed auditory feedback by D. J. King, 229
Paced vs unpaced paired-associate recall by J. P. Houston, 235
Stimulus context and retroactive inhibition in free recall by G. H. Watts and J. M. Royer, 253
Relationship of paired-associate learning and single trial free recall by D. S. Gorfein, C. Arbak, and D. Graves, 330
Time relations in the recall of events of the day by D. L. King and R. H. Pontious, 339
Auditory and visual short-term memory with successive syllable presentation in both modalities by K. W. Grant and P. D. McCormack, 341
Effects of mode of presentation on paired-associate transfer in children by L. E. Price and J. Bennett, 355
Interlist and retention intervals in list discrimination by D. L. Hintzman and R. M. Waters, 357
Generalization in short-term recognition of auditory verbal stimuli by B. W.-S. Poteat and R. A. Kasschau, 358
Processing capacity and short-term memory by P. M. Merikle, 363
Order of report and letter structure in tachistoscopic recognition by M. J. White, 364
False recognition produced by semantic and phonetic relations under two presentation rates by M. Anisfeld, 366

VERBAL PROCESSES
Semantic features and communicability of words of different form-classes by K. Loewenthal, 79
Effects of symbolic modeling on the syntactical productions of retardates by R. D. Odom, R. M. Liebert, and L. E. Fernandez, 104
Meaningfulness (*m*): Its relation to frequency and specificity for children aged nine years by N. I. Mickelson, 202
Mediation as a function of association value in the AB, BC, AC paradigm by T. P. Cooke III and W. R. Blount, 211
Attributes of unfamiliar, long, scientific names by B. Loigman and A. E. Goss, 327
The scaling of syntactic relatedness: A new method in psycholinguistic research by W. J. M. Levelt, 351

PROBLEM SOLVING AND CONCEPT FORMATION
Nonstationary probability processes, event runs, and the development of patterned response habits by J. Halpern and A. E. Lantz, 75
Selective attending changes during concept learning, extinction, and superstition by S. Rydberg and P. W. Arnberg, 99
The effect of varying percentage of positive and negative instances and instructions on conjunctive and disjunctive learning by N. W. Denney, 193
Discrimination among schematic stimuli as a function of response mode, constraint redundancy and form of Markov rule by B. R. Brown and D. F. Dansereau, 197
Do lower IQ children attain concepts more slowly than children of higher IQ? by E. Saltz and H. Hamilton, 210
Differential reward positioning and children's performance on dimension-abstracted oddity problems by A. L. Brown, 251
Rigidity as a function of task complexity by R. R. Schmeck and F. Ribich, 323
Anagram solution as a function of transition probabilities and solution word frequency by M. W. Warren and W. J. Thomson, 333
Overlearning, extinction, and superstition effects on observing behavior in concept learning by S. Rydberg and P. W. Arnberg, 343
Schematic concept formation in relationship to mental ability in adolescents by R. V. Shields, M. A. Gordon, and S. H. Evans, 361

SOCIAL PROCESSES
Observed benevolence and hostility as determinants of interpersonal attraction by J. Hewitt and B. J. Chung, 82
Prejudice and the learning of biracial influence structures by D. W. Lewit and P. J. Shanley, 93
Interpersonal attraction as a function of the accuracy of personal evaluations by J. Hewitt, 95
Interest items as positive and negative reinforcements: Effects of social desirability and extremity of endorsement by W. E. Reitz and L. McDougall, 97
Perceived control and riskiness by K. L. Higbee and S. Streufert, 105
Self-esteem and the effectiveness of reconciliation techniques following an argument by D. L. McMillen and J. E. Reynolds, 208
Exposure and affect: A field experiment by R. B. Zajonc and D. W. Rajecki, 216
Assimilation-contrast effects in impression formation by M. F. Kaplan, 234
The social psychological status of reward by W. H. Melson, B. J. Calder, and C. A. Insko, 240
Risky shift and social exchange in dyads by W. C. Swap and H. Miller, 249
Conditioning and extinction of conforming behavior by F. Sistrunk, 255
Direct reinforcement, sex of model, sex of subject, and learning by vicarious reinforcement by R. E. Phillips, S. B. Bentson, and P. H. Blaney, 325
Coalitions in the triad: Additive case by R. H. Willis, 347
Liberals, conservatives, and conformity by F. Sistrunk and C. G. Halcomb, 349
Physiological and psychological correlates of personality impression formation by J. T. Partington and F. D. Colman, 369
Cooperation and sharing behavior among culturally deprived preschool children by B. H. Wasik, S. K. Senn, A. Epanchin, 371

PHYSIOLOGICAL PSYCHOLOGY

DRUG EFFECTS

Scopolamine effects on locomotor and exploratory activity in rats by G. Walters and R. G. Block, 3

Attenuation of palatability-induced polydipsia by biperiden hydrochloride by M. Matsunaga and J. D. Keehn, 9

Effects of drugs on the preference between electrical stimulation of the lateral hypothalamus and water by G. J. Mogenson, 13

Does d-amphetamine anorexia conform to the law of initial value? by D. C. Boughton and R. Clark, 17

A comparison of morphine and food deprivation on wheel activity by R. C. Trost and P. D. Knott, 25

The effects of atropine on food-reinforced vs water-reinforced VI responding by G. Hines, W. T. Miller, and A. E. Lee, 33

Magnesium pemoline: Different effects with different subject stocks by J. A. Corson, 45

Differential effects of dexamphetamine and phenidylate on auditory detection by T. R. Evans, 139

Failure of exogenous ACTH to influence the acquisition or reversal of a spatial discrimination in rats by P. A. Beatty, T. H. Stolle, and W. W. Beatty, 156

Comparison of the effect of two minor tranquilizers on escape behavior by F. J. Bremner, H. D. Cobb, and T. J. Nagy, 159

The effects of morphine on conditioned suppression in rhesus monkeys by S. G. Holtzman and J. E. Villarreal, 161

Spontaneous alternation and D-amphetamine by J. Adkins, J. W. Packwood, and G. L. Marshall, Jr., 167

Aversions to grape juice induced by apomorphine by K. F. Green, 168

Some effects of scopolamine on locomotor activity in rats by B. Meyers and R. C. Wilchin, 174

Pemoline and magnesium hydroxide (PMH): Performance enhancement after ECS by N. Plotnikoff, 180

Effects of TCAP on water intake in the rat by E. M. Gurowitz, 287

Effect of magnesium pemoline on avoidance conditioning and intertrial activity in two strains of inbred mice by L. T. Yeudall, W. Poley and J. R. Royce, 299

BRAIN FUNCTIONS

Effects of medial thalamic damage on initiation of movement and learning by C. H. Vanderwolf, 23

Aphagia and adipsia following lesions of the amygdala by B. D. Collier and F. P. Gault, 41

Attenuation of retroactive inhibition by a single electroconvulsive shock by D. R. Justesen, J. T. Brauchi, D. H. Dodd, C. L. Sheridan, and L. E. Bourne, Jr., 43

Elicitation of stimulus-bound behavior in guinea pigs by A. G. Phillips and E. S. Valenstein, 131

The effect of reversible lesions in the posterior hypothalamus on conditioned suppression by M. E. Dulle, P. D'Encarnacao, and C. J. Long, 133

Temporal gradient of recovery of a conditioned emotional response following a single electroconvulsive shock by M. Nachman, R. O. Meinecke, and H. D. Baumbach, 137

Different neuronal responses in the cochlear nucleus of a cat during classical and instrumental conditioning by E. S. Halas and J. V. Beardsley, 141

Dimensional preferences with object and pattern stimuli in monkeys with inferotemporal lesions by L. A. Rothblat and W. A. Wilson, Jr., 149

Lesion effects on visual cliff performance in the rat by C. Cheney and R. Crow, 165

Facilitation of passive avoidance acquisition in rats with septal lesions by P. L. Gittelson, P. J. Donovick, and R. G. Burright, 292

Spreading depression vs lesion effects of KCl on classical conditioning in the rabbit by H. Sunenshine and M. Schwartz, 315

BIOCHEMICAL CORRELATES

Chemical changes in the rat brain following escape training by M. Gold, H. Altschuler, M. H. Kleban, M. P. Lawton, and M. Miller, 37

Induced phenylketonuria (PKU): Lack of a critical period in development by R. L. Schalock, 191

Biological effects of saccharin ingestion in rats: A preliminary report by N. R. Remley and E. H. Harrell, 295

Cholinesterase inhibition and sexual receptivity in the female rat by D. F. Hardy and D. M. Warburton, 311

ANIMAL PSYCHOLOGY

Water intake, spontaneous learning for food, activity, and manipulation for talapoin and squirrel monkeys by C. E. Thomsen and T. H. Clewe, 19

A spectral luminosity function in the pigeon determined by flicker photometry by V. A. Graf, 282

CONDITIONING

Within- and between-session CS intensity performance effects in rabbit eyelid conditioning by P. W. Frey, 1

Compound testing of individually conditioned stimuli as an index of excitatory and inhibitory properties by D. Reberg and A. H. Black, 30

Conditioned suppression on a fixed interval schedule of reinforcement by D. O. Lyon and R. D. Millar, 31

Auditory and visual control over chained operants: II. Replication and effects of darkness on auditory control by R. M. Gilbert and P. G. Croskerry, 47

Autoshaping key responses with fish by L. H. Squier, 177

MAZE BEHAVIOR

The effect of goal box delay and separate delay box delay on pattern running by P. E. Campbell and J. A. Horn, 5

The effects of early visual and motor experience on adult problem solving ability in hooded and albino rats by R. J. Lavallee, 21

Sequences of delayed reward and extinction confinement: Effects on pattern running and extinction performance by P. E. Campbell, 34

Behavior in a complex learning situation involving five stimulus-differentiated paths by S. J. Lachman, 36

Noncontingent partial reinforcement reduces spontaneous alternation by J. Adkins, R. K. Hilles, D. S. Weisbrod, and M. R. Emmens, 48

A test of the odor hypothesis using Mongolian gerbils and a random trials procedure by J. S. Topping and J. M. Cole, 183

Superiority of "maze-dull" animals on visual tasks in an automated maze by H. Markowitz and C. J. Becker, 257

DISCRIMINATION LEARNING

Determination of selective stimulus control by part of a compound S^{Δ} by D. F. Johnson, B. N. Kinder, and G. N. Scarboro, 7

Perimeter, complexity and generalization of a form discrimination by cats by J. M. Warren and B. O. McGonigle, 16

Retention of discrimination learning sets by cats by J. M. Warren, 170

Reaction time analysis of discrimination of

direction of line by the pigeon by R. Over, 171
Effect of chromatic surround during nondifferential training and generalization test upon generalization along the angularity dimension in pigeons by M. R. Baron and E. L. Bresnahan, 187
Stimulus information and primate pattern discrimination: Simultaneous changes in positive and negative cue information by T. E. LeVere and R. T. Bartus, 275
Correlations between error scores and the reversal index in rats by F. P. Valle, 283
Nondifferential reinforcement and discrimination learning by J. J. O'Malley, S. J. Arnone, and F. Ziegenfus, 285

AVOIDANCE AND PUNISHMENT
Susceptibility of an instrumental locomotor response to punishment of its generalized consummatory components: Effect of punishment locus by W. G. Braud and R. E. Prytula, 11
The effects of response-contingent and noncontingent shock on free operant avoidance by R. T. Jones, 146
Counterconditioning and fear reduction in the rat by B. Klein, 150
Establishment of a conditioned reinforcer in relation to shock termination–an attempt to replicate by P. S. Siegel and R. O'Bannon, 158
Fixed ratio punishment of free operant avoidance responding by T. A. McCullough, C. J. Shuman, and R. W. McIntire, 164
Change in the feedback stimulus on maintenance of behavior under a free operant avoidance (FOA) schedule by A. E. Roberts and H. M. B. Hurwitz, 173
Active and passive avoidance conditioning: A direct comparison by W. H. Calhoun and R. J. Murphy, 176
Compounding of stimuli maintaining opposing response tendencies in an instrumental avoidance situation by L. Miller, H. Waibel, and G. Pudelko, 263
Fear-increasing effects of experience with shock by H. Cappell and J. Rodin, 267
Failure of visual generalization following auditory avoidance training by R. P. Gruber, 269
Resistance to punishment and extinction in one situation as a function of training with shock or non-reinforcement in a different situation by D. C. German, 271
Effect of CS position reversal on extinction in shuttle air-blast avoidance by T. W. Baker and D. Ziegelbauer, 290
Suppressing an avoidance response by a pre-aversive stimulus by H. M. B. Hurwitz and A. E. Roberts, 305
Effect of the CS-UCS interval on the acquisition of an avoidance response and on its subsequent extinction through massing of trials by P. G. Jaffe and M. Baum, 307

MOTIVATION
Length of sleep and length of waking interrelations in the rat by W. B. Webb and J. Friedmann, 14
A quick method for determining fluid preference: Saccharin preference in water-deprived rats as a function of time on deprivation schedule by D. Fallon, 27
Schedule-induced polydipsia: Conditioned inhibition of salivation by J. E. Grace, 28
Daily activity schedule of captive opossums by R. A. Bombardieri, Jr., and J. I. Johnson, Jr., 135
Stimulus preferences in hoarding by L. M. Scelfo and L. R. Hammer, 155
Effects of sodium deficiency on sodium saccharin drinking by F. S. Bauer, 162
Effects of current deprivation and deprivation experience on exploration by D. Lester, 273
Deprivation and the role of taste in food intake by L. A. Hoff and R. L. Gentile, 277
Preference for various surrogate surfaces among infant rhesus monkeys by C. S. Furchner and H. F. Harlow, 279
Heart rate as a function of water deprivation and conditioning: Some additional controls by R. Goldstein, J. A. Stern, and L. Sturmfels, 280
Copulation in rats: Relations among intromission duration, frequency, and pacing by G. Bermant, L. Anderson, and S. R. Parkinson, 293
Cage activity in the California antelope ground squirrel by A. L. Cone and D. M. Cone, 301
Appetitive conditioning with recovery from thiamine deficiency as the unconditioned stimulus by D. M. Zahorik and S. F. Maier, 309

REINFORCEMENT
Synthesis of double alley and discrimination phenomena: Cue and magnitude specific properties of GI reward by R. S. Calef, P. A. Meyer, F. R. Maxwell, E. R. McHewitt, and J. H. McHose, 39
Some parameters affecting performance on tandem fixed-interval, fixed-interval schedules by D. Meltzer and B. J. Freeman, 129
Effects of percentage of reinforcement in fear conditioning upon the acquisition of an instrumental response by M. J. Homzie, D. W. Shucard, and R. C. Trost, 143
A further analysis of conjunctive reinforcement schedules by E. W. Hitzing and J. H. Kaye, 147
Resistance to extinction of the CER as a function of shock-reinforcement training schedules by C. Scheuer, 181
Responding in chained schedules maintained by conditioned reinforcement with and without terminal primary reinforcement by D. W. Zimmerman, 185
Extinction as a function of size of goal box, reinforcement schedule, and competing responses by H. W. Bradley and R. Wong, 189
The frustration effect as a function of training magnitude: Within- and between-Ss designs by J. H. McHose and J. R. Gavelek, 261
Acquisition of lever pressing in rats under DRL contingencies by G. Coulson, L. Gardner, and V. Coulson, 265
Within-session behavioral contrast? by R. S. Beecroft, 286
Conditioned reinforcement strength in rats as a function of pattern of reinforcement by D. F. McCausland, 289
Intertrial reward (ITR) and delay of reward: Effects on resistance to extinction by L. E. Overstreet, Jr., and P. E. Campbell, 303
Schedule control in the rabbit by W. R. Sewell, A. L. Yehle, T. J. Newsom, J. F. McCoy, and C. J. Long, 313

EMOTION
Stimulus control of schedule-induced aggression in the pigeon by J. M. Cole and P. M. Litchfield, 152
A quantitative genetic analysis of change in open-field behavior of mice by J. C. DeFries, J. P. Hegmann, D. B. Ross, and M. K. Howard, 153
Attachments of infant guinea pigs by W. Sluckin and C. Fullerton, 179
Effects of induced aggression on a low fixed-ratio schedule of food reinforcement by J. G. Hayes, M. F. Daley, and C. D. Cheney, 259

SOCIAL BEHAVIOR
Effect of maze experience on dominance hierarchies by J. F. Brennan, 288
Behavioral selectivity in tropical fish by H. A. Cross, L. J. Laux, J. C. Wright, V. J. Pezoldt, J. J. Lowenstein, T. D. Vincent, and N. W. King, 297
